

# Welcome!

BALCOR was born from a consulting company for the promotion of rural producers, founded in 2003 called DURUM CONSULTORIA. During these years, it kept investing in expansion of production capacity, production innovation and working capital. Today, called BALCOR Trading, focused on the internationalization of Brazilian companies and cargo imports with all the know-how, expertise and networking coming from the period of consulting and promotion for large industries. Our goal is to serve Brazilian companies that want to put their products on shelves outside the country or bring imported products to our market.
